

# Summary of Contents

|                                                               |            |
|---------------------------------------------------------------|------------|
| <b>Introduction</b>                                           | <b>1</b>   |
| <b>Chapter 1:</b> Why Meta Data? Why XML?                     | <b>11</b>  |
| <b>Chapter 2:</b> XML Schemas                                 | <b>25</b>  |
| <b>Chapter 3:</b> XML Linking and Querying                    | <b>63</b>  |
| <b>Chapter 4:</b> RDF Model and Syntax                        | <b>97</b>  |
| <b>Chapter 5:</b> RDF Schema                                  | <b>167</b> |
| <b>Chapter 6:</b> Parsing RDF                                 | <b>203</b> |
| <b>Chapter 7:</b> Topic Maps and XTM                          | <b>251</b> |
| <b>Chapter 8:</b> Meaning Definition Language                 | <b>289</b> |
| <b>Chapter 9:</b> Meta Data Architectures                     | <b>327</b> |
| <b>Chapter 10:</b> Processing Techniques for Meta Data        | <b>357</b> |
| <b>Chapter 11:</b> Further Topic Map/RDF Developments         | <b>387</b> |
| <b>Chapter 12:</b> Exposing Relational Databases              | <b>419</b> |
| <b>Chapter 13:</b> Data Validation and Mining with Schematron | <b>473</b> |
| <b>Chapter 14:</b> Process Descriptions                       | <b>489</b> |
| <b>Chapter 15:</b> Inferencing Systems                        | <b>509</b> |
| <b>Chapter 16:</b> Advanced Meta Data Use Cases               | <b>517</b> |
| <b>Appendix A:</b> Glossary                                   | <b>539</b> |
| <b>Appendix B:</b> Useful Resources                           | <b>558</b> |
| <b>Index</b>                                                  | <b>566</b> |
